- Generates professional quotes with your company logo that can be presented to your customers.
- Training tools available for new employees.
- Reporting tools live and in real-time.
- Compatible with tablet, smartphone, and PC.
- Responsive and easy to use.

Patented Hydroshield™ Technology

Our exclusive Hydroshield Technology protects our doors against moisture and humidity infiltration by creating a fully composite barrier that encases and protects the door on all six sides. It prevents warping, delamination, corrosion, rotting, and the buildup of mold and mildew. When paired with our PF (Polyfiber) Door Frames, our doors with Hydroshield Technology create an impenetrable entryway.

1 Fiberglass Reinforced Door Skins

Our exclusive formula is measured precisely to ensure each skin is produced to the highest quality. With unlimited design options, customized panel configurations are possible. The skins require little maintenance and will not splinter, dent, warp, rot, or rust. They can be painted or stained, and we provide a variety of graining options.

2 Full Length Composite Stiles

Our full-length composite stiles protect the door from external moisture to prevent warping or rotting. They have twice the screw-holding strength of wood.

3 Composite Top & Bottom Rails

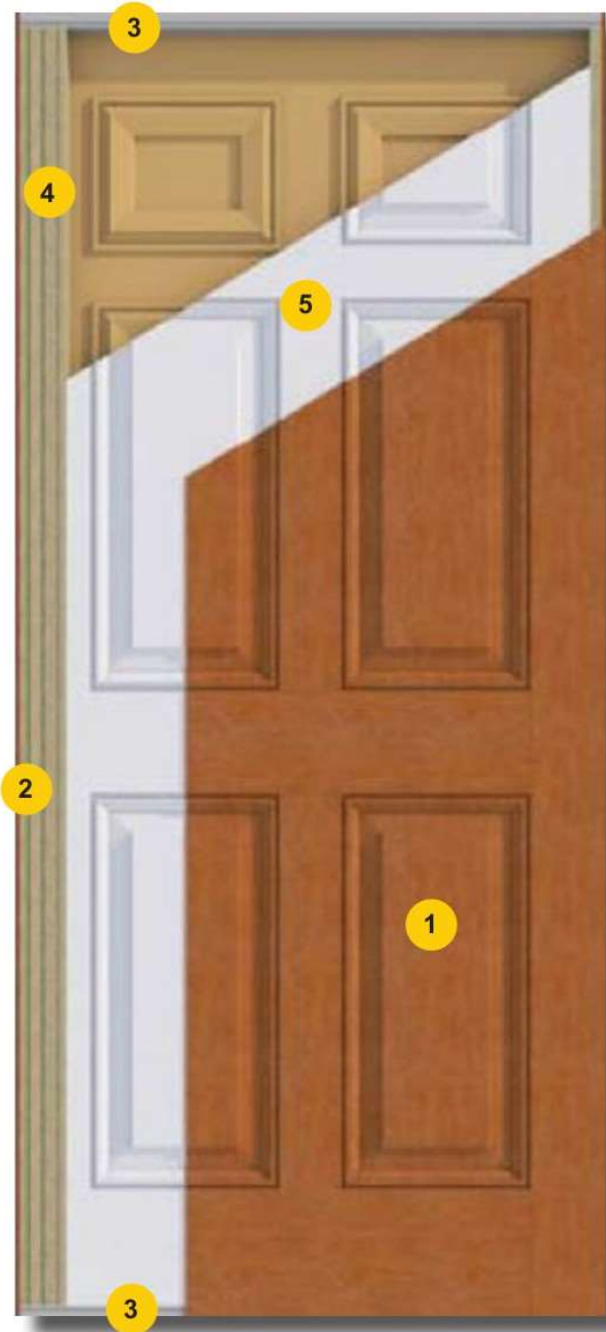

High strength composite top and bottom rails prevent moisture from seeping into the door and stop the buildup of mold.

4 Extended Lockblock

Shuster's full length LVL allows any type of lock to be placed for increased security. Our 8'0" doors have a steel bar in addition to the LVL to help increase the structure's rigidity.

5 Polyurethane Foam Core

Our advanced CFC-free, high density, Polyurethane foam core enhances the door's soundproofing capabilities and provides insulation up to six times greater than wood doors.

Door Materials

Fiberglass Smooth (FGS)

Our Fiberglass Smooth Series is made with a pre-pigmented white skin; its simplicity gives a modern design and feel to any home. Our smooth skin, incorporated with a variety of panel designs and glass options, gives a clean, minimal look to any of our fiberglass doors.

Fiberglass Fir Textured (FGF)

Our Fiberglass Fir Series features straight, fine, vertical graining that produces outstanding results. Accessorized with Simulated Divided Lites (SDL) and a dentil shelf (see Craftsman Shaker Series section), it is no surprise its become a favorite. These fir doors create fine details and give your home a traditional, craftsman appeal.

Fiberglass Knotty Alder Textured (FGKA)

Our Knotty Alder Series was specifically selected to showcase its rich, luxury, graining. This fine, subtle, but detailed hardwood is prized for its natural luster and attractive grain. Its subtle swirls, rich grain pattern with sounds knots will complement any home.

Fiberglass Smooth Builders Grade (FBG)

The Fiberglass Smooth Builder's Grade Series is our import brand similar to the quality of our original fiberglass smooth material, but at an economical price.

Fiberglass Mahogany Textured (FGM)

The Mahogany Series brings a beloved wood texture into traditional, timeless styles. Our doors come with classic panel designs that can carry all of our decorative glass designs and more. This series radiates beauty, elegance, and strength to your home.

Fiberglass Oak Textured (FGO)

Dressed in rich oak grain texture, our Oak Series gives a classic look to your home. Oak doors come in many panel designs. Mix and match these styles with our entire glass line to find the combination that best brings out your homes unique characteristics. These doors create a timeless look that will never go out of style.

True White Oak (FTWO)

The True White Oak Series combines the best features of our Smooth and Oak Doors. Any home can enjoy a rich oak texture pattern in a pre-pigmented white skin. With many choices of decorative glass to choose from, create a look that is both timeless and modern.

Steel Builder's Grade (SBG)

Our Steel Builder's Grade Doors offer the security of steel. Equipped with 26 gauge wood aged steel and available in a wide range of profiles, these steel doors are a sound choice.

Jambs

Jamb Types

Composite Primed

- Hydro Shield Technology
- Fire Rated to 20 Minutes
- Fully Composite
- White Weatherstripping
- Storm Door Ready available up to 6 9/16"

*4 9/16" & 6 9/16" Solid Jamb
Extension Program to 10 1/4"

Composite White

- Hydro Shield Technology
- Fire Rated to 20 Minutes
- Fully Composite
- White Weathershipping
- Prefinished White
- Storm Door Ready available up to 6 9/16"

*4 9/16" & 6 9/16" Solid Jamb
Extension Program to 10 1/4"

Composite Grain

- Hydro Shield Technology
- Fire Rated to 20 Minutes
- Woodgrained Composite
- Beige Weatherstripping
- Storm Door Ready available up to 6 9/16"

*4 9/16" & 6 9/16" Solid Jamb
Extension Program to 10 1/4"

Beast No-Rot

- No Wick Bottom Primed Wood Jambs
- Storm Door Ready available to 6 9/16"
- Beige Weatherstripping

Redi-Flex

- Pre-finished White
- Beige Weatherstripping
- Up to 7.5" Jamb Extentions

How Trilennium® Works

When activated, each Trilennium® bolt becomes a true deadbolt that cannot be compromised.

One simple turn of the key or thumbturn engages all three bolts for perfect alignment and added performance.

With the panic release feature, just one turn of the lever disengages all three bolts at once for easy operation.

A stronger multi-point lock with I-Beam construction means ultimate peace of mind for you.

Trilennium® Locks

TRILENNIUM®
3000

TRILENNIUM®
COMPATIBLE
ASTRAGAL

Multi-point security for standard door panels (Single and French active panels).

Enhance protection against leaks and drafts with our cost-efficient Trilennium® Compatible Astragal (3000 and 3070 only).

To have a complete entry system, it is important to consider the material of the door frame. Wood doors and frames are prone to warping, rotting, and cracking, while steel doors and frames can rust and dent. You don't want to install a door that will fail, nor do you want to install a frame that will fail.

Shuster's PF (Polyfiber) Door Frames are a uniquely formulated, and innovative alternative to traditional door frames. They combine the beauty of wood but require less maintenance and have a longer lifespan. The material is durable, long-lasting, and is more thermally resistant than either wood or metal. The advanced system can be installed the same way as traditional wood frames with no added hassle. When used together with a fiberglass door, they create an enhanced, impenetrable entryway.

FEATURES & BENEFITS

- Equipped with HydroShield technology, it will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Frame is not able to be infested with termites at any point along the structure.
- Has twice the screw holding power of traditional wood door frames.
- More versatility in design. Available in various lengths and widths that can be stained as well as painted.
- Maintenance free and energy efficient.
- Continuous piece with no finger joint and is 25% more rigid than wood frames.
